

Experiential Learning Methodologies addressing vulnerable employed and unemployed people

The main objective of the ELMET project is to use experiential learning and more specifically educational escape rooms, as a tool that allows c-VET trainers to face the new challenges that are imposed in terms of design and delivery.

To do this, we have developed the ELMET Toolkit that allows trainers and training experts working in c-VET to design and use educational escape rooms as a new learning methodology, focused on developing the skills and key competencies requested from the changing working environments.

THE ELMET TRAINING TOOLKIT

The ELMET Training Toolkit for the design, development and evaluation of experiential learning programs will offer an innovative set of resources that include:

- A **training course** on the design of escape rooms: specific for the continuous training field.
- A **guide** to support each of the stages that comprise this learning methodology: design, implementation, facilitation and evaluation.

Toolkit

ELMET TOOLKIT for the design, delivery and evaluation of experiential learning programmes will offer a complete set of ready-to-use resources, including:

- 1**
Training course
A training course on the design of escape rooms: specific for the continuous training field.
- 2**
Guide to support
A guide to support each of the stages that comprise this learning methodology: design, implementation, facilitation and evaluation.
- 3**
Deployment
A guide to support the creation of 100% digital based escape-rooms.
- 4**
Specification
3 ready to use escape rooms in offline version and 3 ready-to-use escape rooms in online version, focusing on the 3 main transversal topics identified among the needs of active and collaboration in intercultural environments).

[Access to the Toolkit](#)

- A **guide** to support the creation of 100% digital-based escape-rooms.
- **3 ready to use escape rooms** in offline version and 3 ready-to-use escape rooms in online version, focusing on the 3 main transversal topics identified among the needs of active workers or unemployed people:
 1. 21th century soft-skills
 2. New skills for digital working environments
 3. Green transversal skills

WHAT HAVE WE DONE SO FAR?

The project is coming to an end...

During these months, the ELMET project work team -CIP Citizens In Power, Panepistimio Thessalias, Media Creativa 2020, Business Foundation for education and Diputación Foral de Álava- have held three transnational meetings, in online format given the restrictions of mobility imposed by COVID, thanks to which we have planned and developed the different phases of the project, we have defined and implemented the Management Plan, the Dissemination Plan, the Quality Plan and the Communication Plan.

After that, and once all the materials of the Toolkit have been developed and translated, we have carried out the testing phase in which, with the collaboration of experts, trainers and students, we have reviewed the materials and taking into account their valuable opinions, the necessary improvements will be made according to their suggestions.

We have also created our website www.elmetproject.eu and our social networks accounts in Facebook (@ELMETproject) and Instagram (@elmetproject), to which of course we invite you to join us to keep up to date with all the news of the project.

WHAT IS NEXT?

In these coming months we will make the necessary improvements according to the results obtained from the testing of the Toolkit and we will create the final versions of the materials in all partners' languages (English, Spanish, Greek and Bulgarian). Moreover, we will continue working on the dissemination of the project and its materials, and in September 2022 we will end the project and show all the results at the Multiplier Events that we will organize in all partner countries. The final conference will take place in Vitoria-Gasteiz (Spain).

Follow us and stay tuned!
